Downloading AutoCAD software is usually downloaded from the Autodesk website in the .zip file format, but can also be found in the "Autodesk Download Center". The software installer for Windows uses the Advanced Installer software. An alternative to using a download manager is to use the AutoCAD.exe installer from the Autodesk Exchange Apps store, which is officially unsupported

but does work. This method downloads the AutoCAD application through the Autodesk Exchange store, and can be used on Linux and Windows machines. The X-Treme Installer for AutoCAD provides a convenient way to install AutoCAD for macOS. A Free open-source AutoCAD add-on was published in 2009 by the author. The reader should not rely on browser-based installation or "Autocad Online" to keep their drawings

up to date and, where possible, users should download the latest version of AutoCAD directly from the Autodesk Exchange store, as new features are being released. Twelve nematode species, representing two genera and four

families, were found in adult bovine cadavers in an endemic malarious area of Mexico. Five of these species belong to the family Strongylidae, and were identified as species of the genera *Trichostrongylus* and *Bunostomum*, which are facultatively parasitic and occasionally found in the genus *Arion*, and two species of the genus *Heligmosomoides*, which are facultatively parasitic and usually found

in the genus *Trichuris*. One of the species of *Arion*, *Arion rufus* (Edwards), was found in two cases. The new species belongs to the genus *Nematocida*, and the species name is *N. bovina* (Ridley, 1893). The other species of *Arion* were not identified. Another genus of strongylids was the family *Dioctophyllidae*, represented by the species *Streptopharagus squamatus* (Cobbold). No nematodes were found in

the intestinal tract of the two carnivores that were examined. Species of the genus *Leptomonas*, which are sometimes found in the genus *Trichuris*, were found in all of the cadavers examined, but were always associated with *S. squamatus*. A species of *Heligmosomoides* was also found in this association.
