

[FSX] Accu-Feel Global FSX Enhancement TORRENT Serial Key

I think this might be related to my Accu-Feel issue. For some reason my copy of FSX doesn't like third party add-ons. There is a mention on the official website that this problem may be related to the version of FSX itself. The FSX version is 2.5 and the simulator version is 3.5. It is possible that FSX 2.4 will "swallow" third-party add-ons. I'm currently using FSX with simulator version 4.4 and I'm fine. It may also be that the add-ons do not work because I installed something incorrectly. For example, when installing an add-on, you must specify the path to the program where it is installed, otherwise it will not install.
