Listen to the music and let yourself get wrapped up in the game-making atmosphere created by the game's design concepts: sound, music, and interactivity. 21-track version of the original soundtrack was released in 2009. Original soundtrack was used in music videos by dancer and choreographer Koms Kudurma, and the Estonian National Ballet during their performance in the international dance festival Tanz Der Dance. Music composed by Ville Virtanen (sound designer of the game), and sound effects by Juuso Paasela and Satu Huhtula.

Prelude A unique study of the real world, where the lines between dreams and reality are blurred. Look into the world of old-fashioned folk tales and fairy-tales, where a deep, dark secret is revealed. A strange world of buried secrets, where the lines between dreams and reality are blurred. Look into the world of old-fashioned folk tales and fairy-tales, where a deep, dark secret is revealed. Experience the world of the nightmare in its modern-day. An old, yet untouched world, where the night and the day live side by side. Search for the wandering soul, which strives to find peace in the darkness, to restore light where there is none. Remains of a secret age, where the lines between dreams and reality are blurred. The world of dreams, where lies are believed to be truth. All that is hidden from the senses, feels like a real life. Go inside the world of the nightmares where the worlds of dreams and reality collide. The force of emotions and thoughts are like a machine, leaving nothing behind and only consuming. Video game sound designer Ville Virtanen designed the music for the game, influenced by the mood of the game and the Russian and Asian traditions that are the roots of epic fantasy epics. Each cutie-pucky of characters contains a deep, dark secret and desires and fears that only to be revealed in the night. The music is a haunting track built from multiple layers of instruments: from war drums to the gentle piano notes, and from the tap of a shaman's staff to the

winds of the night. Use your skills and your intuition to uncover the hidden stories.
