When the player encounters their first Skyla, they're sent to a Pokemon center that helps to heal their Pokemon and earn exp for interacting with the other trainers of the game. When the player travels to the center to reset their Pokemon, they are asked to answer some simple math questions to earn a prize for their efforts. If the player completes the questions in time, they will receive a free TM. Every Pokemon game has its own particular flavor, which is why there's no one recipe for success. With that being said, however, the one certain fact that can be used to separate the good from the bad is the presence or absence of gyms. In Pokemon Fire Red, the only place that the gym leaders reside is in the gym on Route 202. The gameplay in Pokemon Fire Red is pretty straightforward, with a handful of random encounters with other trainers thrown in for good measure. Each of these trainers has their own personality, and their own reasons for coming face-to-face with your Pokemon. Some trainers have a genuine dislike of a particular type, and if you're looking to hold some serious grudges, you should keep that in mind. When the player first starts out of the gates, they may encounter a Pokestop, which is akin to a portable vending machine. The player can purchase items here, and also release six of their Pokemon for the purpose of being

healed and leveled up. There's just one catch to getting these little guys well enough to be used. To do so, you'll need to head over to Professor Oak's lab. This is also where the player picks up the message that they've caught a strange Pokemon, meaning they're ready to join the world of Pokemon. After this, players have the opportunity to send one of their Pokemon to evolve at Oak's lab, where they're given a choice of three Pokestops. 5ec8ef588b
